

Hello former IINSPIRE students,

Congratulations on your graduation! My name is Paul Faronbi, and I graduated with a B.S in Chemical Engineering a from Iowa State University in December 2016. I am currently working as a Reliability Engineer at General Mills as one of my rotations as a Manufacturing and Engineering Associate (MEA).

I'm Queenster Nartey, and I earned my B.A. in Biological Chemistry from Grinnell College in May 2016. I am currently working as an ORISE Fellow at the U.S. Food and Drug Administration through the Oak Ridge Institute for Science and Education Program.

We hope that post-bacc life is treating you well so far! We are reaching out to extend you an invitation to become part of the new **IINSPIRE-LSAMP Alumni Committee**. The goal of this committee is to establish a resource to tap into to bring-post baccalaureates students or professionals back for conferences, workshops, or virtual discussions. We are currently developing the framework of this group however, we would first like to gauge the level of interest. Please email us at your earliest convenience about whether you are interested in being a part of this group. We greatly benefited from IINSPIRE-LSAMP and we are ready to give back.

In addition to your interest, please feel free to add any ideas you have to your email. Together, we will build a stronger IINSPIRE community and impact the lives of students just like you.

Sincerely,

Queenster Nartey & Paul Faronbi

\*\*We are sending you this email with the help of the campus directors of your graduating institution.
